Detailed Description

... The offer may define conditions that the customer must meet in order to receive the bonus . The customer may meet the conditions while participating in a second transaction with the soliciting merchant. For example, the customer may be required to spend at least a minimum purchase price at the second merchant on a particular day. Once the conditions are satisfied, the bonus is awarded to...

...one embodiment, the bonus is applied by crediting a credit card account used during the first and/or second transaction .

The present invention is particularly advantageous in that it allows various merchants to participate in...offer is provided to a customer if the customer satisfies criteria while participating in a first transaction with a first merchant. The first merchant, known as an "outputting merchant", outputs the offer for a bonus once the customer satisfies the criteria. It will be understood 2 0 by those skilled in the art...

...well.
The bonus value is typically expressed as, for example, a percentage off the previous (first) transaction during which the offer for the bonus was made. The bonus value may also be...

...required to participate in a transaction with the soliciting merchant in order to receive the bonus . The customer may also be required to participate in a transaction at an indicated time, having an...

...example, the entry 1008 indicates a bonus of five percent off the previous transaction. A customer 0 receives this bonus after having participated in a transaction for more than \$ 1 0.00 with merchant "MOOO ...at a plurality of soliciting merchants. Accordingly, the customer would have to participate in a first transaction at a first merchant, a second transaction at a second merchant, and then a third transaction a third merchant. The 1 5 customer may be required to participate in any number of transactions in order to receive the offered bonus .

The routing of customers from an outputting merchant to a soliciting merchant may be based on the activity rate...

LANGUAGE: English RECORD TYPE: Abstract

ABSTRACT:
Computer and software manufacturers are offering low- priced products
for first -time buyers who do not require high-tech features and for
users who only need a second or third computer. Manufacturers and
retailers are working on the belief that once users are introduced to
low-priced systems, they will be urged to upgrade. Packard Bell NEC has
launched a Pentium C115 computer that costs \$799 at discount stores
while Compaq Computer Corp. will launch a \$999 Presario 2100. These
low-priced computers...

The price of money: Consumers' understanding of APRs and contract interest
rates
Lee, Jinkook; Hogarth, Jeanne M
Journal of Public Policy & Marketing v18n1 PP: 66-76 Spring 1999
ISSN: 0743-9156 JRNL CODE: JMP
WORD COUNT: 7252

...TEXT: 1979) group information sources into three types:
consumer-oriented/personal (friends, relatives, and neighbors), commercial/
seller (manufacturers, retailers , and trade associations), and
independent/third- ...agencies and levels of government, independent rating
agencies, and organizations that certify the quality of products).

If consumers want to know price information , family and friends are
less likely to provide relevant or accurate information, whereas sellers
are more likely to provide accurate price information. Moreover, sellers
have a strong incentive to disseminate information to consumers
(Beales et al. 1981); thus, sellers offering competitive prices are eager
to inform consumers . Third-party-provided information , such as
comparative information, is useful in providing price information across
various sellers , as well as enhancing consumer understanding with
supplemental information . However, some researchers (Anderson and
Engledow 1977; Thorelli, Becker, and Engledow 1975; Thorelli and Engledow
...

...highly educated with more discretionary income, use thirdparty
information. Therefore, the relationship between sources of information
and consumer knowledge can be hypothesized as follows :

H6: Obtaining information from personal sources is not related to
consumers' understanding of the APR-CIR difference...

Uses and consequences of electronic markets: An empirical investigation in the aircraft parts industry

Choudhury, Vivek; Hartzel, Kathleen S; Konsynski, Benn R

MIS Quarterly v22n4 PP: 471-507 Dec 1998

ISSN: 0276-7783 JRNL CODE: MIS

WORD COUNT: 16910

...TEXT: other hand, the buyer's primary objective is more likely to be to find the seller with the best product fit and minimize the "product fit costs" that the buyer must incur if he/she purchases from some other seller. If the electronic market does not include prices, the buyer will begin by manually obtaining price information from the seller with the best product fit.² If this seller's price is higher than the buyer is willing or able to pay, the buyer will move on to the seller with the next best product fit until he/she finds one with the right combination of product fit and price. This is not much different from a manual search process. Sellers can continue to charge a premium equal to the value of the better product fit plus the buyer's search cost of contacting an additional seller. Thus, a minimal impact on prices is expected; the primary benefit to the buyer is that the electronic market increases the chances of finding the seller with the best product fit.

With a differentiated electronic market that includes price information, the buyer will still begin by evaluating the seller with the best product fit. However, in this case, the buyer can also compare prices at no additional search cost and judge if the seller with the best fit is charging a premium higher than the value of the better product fit. That is, sellers will no longer be able to charge a premium for the search costs, only for the better product fit. Thus, prices should be lowered.

Summarizing the above discussion, the following hypothesis, which is consistent with earlier...to begin listing prices on ILS and brokers should continue to add value by assisting buyers with negotiation.

Information verification: Another source of value added by brokers is a function that may be termed "data validation." As noted earlier, sometimes sellers list parts on ILS that they do not have in inventory, hoping to get buyers...

...have increased in importance because a buyer searching ILS may find a longer list of suppliers, many of whom the buyer has never transacted with before.

The need for data validation...

Explore your data options

Blundin, David

Discount Store News v37n7 PP: 20 Apr 6, 1998

ISSN: 0012-3587 JRNL CODE: DSN

WORD COUNT: 666

...TEXT: market conditions change.

And the payoffs are enormous. One of the world's largest discount retailers is using data mining to forecast inventory a few percentage points more accurately-saving \$12 million per year in mark - downs and

inventory costs . Another is using data mining to uncover what products sell best together at what prices . The company last year optimized pricing during a Back-to-School promotion , and increased the overall margin on the promotion by 15%. A large supermarket chain, which discovered that upscale customers were starting to defect to competitive stores, used data mining to find out what those customers had in common, and created targeted incentive programs to recapture 50% of the defectors. Subsequently , their buying patterns returned to previous spending levels.
Is data mining a panacea? No. As in decision...

Heuristic approaches to purchasing bundles of multiple products from multiple vendors
Van Buer, Michael G; Venta, Enrique R; Zydiak, James L
Journal of Business Logistics v18n1 PP: 125-140 1997
ISSN: 0735-3766 JRNL CODE: JBL
WORD COUNT: 2651

...TEXT: the resulting analysis tractable.

We assume that a buyer has already established a network of vendors . Even in today's JIT environment with its emphasis on single-sourcing, the desire to reduce risk and maintain competition among vendors can lead purchasing managers to split their orders within a multiple-sourcing network.'2 We also assume that bundles offered in the vendor network consist of quantifiable commodities that are perfect substitutes for those required by the buyer . All vendors are assumed to follow a mixed bundling strategy, i.e., they each sell individual items as well as bundles...

...also assumed that a competitive market exists for the unbundled individual items so that all vendors that offer an item do so at the same fixed, undiscounted price .

Bundles are priced to provide a discount to the buyer. In other words, the fixed price of the bundle is less than...

Determinants of search for nondurable goods: An empirical assessment of the economics of information theory

Avery, Rosemary J

Journal of Consumer Affairs v30n2 PP: 390-420 Winter 1996

ISSN: 0022-0078 JRNL CODE: JCA

WORD COUNT: 8695

...TEXT: of the use of fliers and advertisements to search for product/price information prior to purchase .

Another possible factor explaining the low level of in-store price awareness may be the high cognitive cost of collecting item specific prices . The accumulation of item specific information is difficult due to the complexity of the task (the multiplicity of item prices to be identified and remembered), the instability of prices over time, and the intensity of price dealing (specials, quantity discounts , rebates , and coupons). The Progressive Grocer ("How Consumers Shop" 1992) reports that "routine" shoppers have an...

...the check-out register and consumers doing "stock-up" shopping have an average of 48 items . The cognitive cost of processing information such as price, quantity, and quality information on 48 different food items in the store would be substantial. Ackerman (1989) reports that the cost of obtaining complete item price information is so high that consumers tend to simplify the decision task by ignoring specific price information and instead forming a "general" impression of the store (retailer) as either high or low priced. The costs of processing this information differs for consumers with varying cognitive abilities. Education and market experience may contribute substantially to lowering the cost...

...of search. Thomas and Garland (1993) report that list making is one strategy used by consumers to process grocery market information in an efficient way. It is interesting to note that in this study making lists...

Managing the Quality Process: Lessons from a Baldrige Award Winner - A Conversation with John W. Wallace, Chief Executive Officer of the Wallace Company

Hill, Robert C.; Freedman, Sara M.
Academy of Management Executive v6n1 PP: 76-88 Feb 1992
ISSN: 0896-3789 JRNL CODE: AEX
WORD COUNT: 7063

...TEXT: these costs will inevitably necessitate accepting trade-offs. Is the improvement in quality worth the investment in the quality program? Second, the costs of the improvements in quality may require higher prices. Are customers willing to pay extra for the kind of service that a systematic quality program will...

...most purchasing agents emphasize the dollar differences in cost when negotiating and deciding on a supplier. Thus, companies interested in a quality program may have to educate potential customers on the real costs of their product, emphasizing the benefits of a supplier with a proven quality program. For instance, the time and human resources required to inspect shipments, return incorrect orders or faulty products, the downtime from late deliveries, costs of inventory buffering, etc. are all cash costs that may be overlooked by a purchasing agent rewarded for obtaining the lowest price. John Wallace believes that the benefits of his company's quality program more than outweighed these costs.

The Wallace Company experience...

...headache and risk involved in connecting to multiple B2B eMarketplaces represent only half the battle sellers currently face. These online markets are controlled, maintained and driven by buyers, and sellers are forced into being mere commodities that compete solely on price. Thanks to HAHT, that is all about to change. With HAHT Sellside Exchange, sellers can not only easily and efficiently connect to multiple eMarketplaces, but also gain the ability to leverage their back-end business systems in real-time during every transaction in order to deliver additional value to every customer. Now, sellers can deliver customized, real-time information to buyers in eMarketplaces including promotions, customer-specific pricing, up-to-the-minute product availability and order status. Additionally, with HAHT Sellside Exchange, sellers can tap into the wealth of intelligence being generated about buyer behavior and eMarketplace performance...

...offers a certain profile buyer or where the highest prices are being paid -- to enable sellers to make more effective targeting and marketing decisions. "Today, democracy has finally reached the shores of eMarketplaces," said Rowland Archer, president and CEO of HAHT Software. "With HAHT Sellside Exchange, sellers are no longer just price tags to buyers, but instead gain collective bargaining power and...

ISSN: 0959-0552 JRNL CODE: RDM

WORD COUNT: 911

...ABSTRACT: and revenue, BEATRICE shows the profitability of each individual transaction. Rosenbluth Travel has also used information technology to segment its customer base and differentiate its services, particularly in its business travel facilities. Supermarkets too are leaders in market segmentation with promotions based on individual household purchases. Price Chopper in New York State was among the early practitioners, issuing machine-readable account cards to customers. Information technology can be applied to customer transactions to support the following 3 vital primary functions: 1. identification and segmentation of customers, 2. differentiation of goods and services, and 3. a pricing policy derived from value delivered. Clearly, failure to segment, differentiate and adopt flexible pricing can...

Invasion of Privacy: A Dilemma for Marketing Research and Database Technology

Morris, Linda; Pharr, Steven

Journal of Systems Management v43n10 PP: 10-11, 30-31, 42-43 Oct 1992

ISSN: 0022-4839 JRNL CODE: JSM

WORD COUNT: 4202

...TEXT: use of database storage, retrieval and sharing technologies and/or the commercial use of the customer data of interest may become prohibited. Worse yet, the backlash of social outcry and governmental regulation...

...processing, both automated and manual.

Finally, the consumer faces tradeoffs associated with the regulation of information flow at the customer /firm interface. Currently, the consumer stands to benefit from the apparently inherent efficiencies of micro...

...the consumer is the degree of invasion of privacy associated with both the gathering of customer -related information and the combining and sharing of databases for profit and nonprofit purposes.

At the other...

...parties have a stake in the outcome of the invasion of privacy issue.

Robert Finley

The private costs and the benefits to the commercial sector will very likely be of little consequence in the final analysis. The reaction of society will rest upon the public's cost and benefits and the private costs and benefits born by the individual consumer. The balance will be an acceptable sacrifice of privacy for consumer awareness, product choice and cost. Another consideration will be the reaction of the commercial sector. If marketers and IS specialists...

TEXT:

...for figuring profitability. As a result, financial companies are frequently at a loss about what data to collect to evaluate customers. They also need to know what amount of data it is necessary to collect, and ...

...precision and accuracy-a situation that further complicates an already complex effort. The users of customer profitability information are legion. Ideally, every employee with any degree of customer contact will be privy to...

...the bank, even those who rarely have contact with customers must also have access to customer profitability data. At issue is finding ways to measure customer profitability that are relevant to the types...

...demonstrates, companies in the United States have very different policies regarding who has access to customer profitability information. The sensitive and confidential nature of customer profitability information leaves many financial firms unwilling to provide any information to customer contact personnel. Institutions committed to CRM typically make information on the relative profitability of customers available to contact personnel...

...be rated Gold. Organizations that provide their contact personnel with more detailed and sophisticated profitability information on customers do so only after extensive training on how to use and interpret that data. In most U.S. financial companies that measure customer profitability, users of the information are typically located in a headquarters or administrative office. Although such personnel may not have direct contact with individual customers, they use the information for both tactical and strategic purposes. In addition to the users listed in Table 2...

...managers, strategic planners, advertising representatives, segment managers, controllers, budget and financial analysts, and operations staff. Customer information is widely used every day to inform an extensive range of tactical and strategic bank decisions. As Table 1 demonstrates, basic information on customer profitability is of value to decision-makers across an enterprise. How they use information and...

...vary, but the value of having access to the information is undeniable. Of course, while customer profitability information can assist a financial institution make better decisions, it is not the sole criterion for doing so. Financial professionals draw upon customer profitability data for a wide range of decisions, including the following: Sales and service messages Depending on the sophistication of the financial institution, sales and service staff...

...purchasing Buying of media advertising and the associated positioning in the market are enhanced when customer profitability information and dynamics are factored into the creation of a marketing campaign. Product pricing An obvious benefit of measuring customers' contributions to the

organization is the ability to selectively re-price existing products and services to improve the profitability of marginally profitable customers. This has been the case...

...such as Chase Manhattan, KeyCorp and Bank One, which have successfully completed campaigns to re-price their products in the recent past. The use of customer profitability information also can mitigate some of the risk inherent in restructuring an existing portfolio. Fee waivers whether raw customer profitability information is provided to bank contact personnel or rules on waivers are provided by so-called...

...locations Institutions wishing to expand or close branches make better-informed decisions if they have customer profitability information in hand. The placement of a branch, its size, the number and types of services...

...is accessible. An ever-present challenge to a financial institution is to understand how much customer profitability data is necessary for any given type of decision. A simple relative profitability ranking may prove ...

...when deciding to waive a fee, but more complete information may be necessary before re-pricing a product or deciding how to staff a branch. Not only must financial institutions understand the various Table 3 provides a sample of how an institution might use customer profitability data. Ideally, a system for measuring customer profitability should contain the capability to measure individual customer...

...widely-for some companies it is simply too much effort. For many institutions, however, the commitment to measuring individual customer contribution will mirror the adherence to a customer relationship management sales and service business strategy...

CONSISTENT SET OF INTERFACES DERIVED FROM A BUSINESS OBJECT MODEL
ENSEMBLE D'INTERFACES COHERENT DERIVE D'UN MODELE D'OBJETS COMMERCIAUX

Patent Applicant/Assignee:

SAP AG, Dietmar-Hopp-Allee 16, 69190 Walldorf, DE, DE (Residence), DE
(Nationality), (For all designated states except: US)

Patent Applicant/Inventor:

SEUBERT Michael, Volgelsangstr. 10, 74889 Sinsheim, DE, DE (Residence),
DE (Nationality),

RASCH Jochen, Freiherr-vom-Stein-Str. 6, 69207 Sandhausen, DE, DE
(Residence), DE (Nationality),

KUEHL Axel, Kurpfalzstr. 58, 69226 Nussloch, DE, DE (Residence), DE
(Nationality),

BECKER Dirk, Roter Weg 37, 74934 Reichartshausen, DE, DE (Residence), DE
(Nationality),

BIEHLER Markus, Am Schloessel 1, 76829 Landau, DE, DE (Residence), DE
(Nationality),

BOCK Daniel, Fritz-Frey-Strasse 5, 69121 Heidelberg, DE, DE (Residence),
DE (Nationality),

BROSSLER Andreas, Laerchenstr. 19, 74211 Leingarten, DE, DE (Residence),
DE (Nationality),

COLLE Renzo, Oppelner Strasse 2, 76437 Rastatt, DE, DE (Residence), DE
(Nationality),

DELEDDA Giovanni, Im Holder 7, 69231 Rauenberg, DE, -- (Residence), --
(Nationality),

DIELSCHNEIDER Ralf, Bangalore, IN, IN (Residence), DE (Nationality),

DOERNER Robert, Dieselstrasse 1, 63071 Offenbach, DE, DE (Residence), DE
(Nationality),

DROUIN Phillippe, Merianstrasse 9, 74889 Sinsheim, DE, DE (Residence), DE
(Nationality),

EGETOFT Karsten, Beethovenstr. 3/5, 69168 Wiesloch, DE, DE (Residence),
DE (Nationality),

FRANKE Stefan, Delmer Bogen 24a, 21614 Buxtehude, DE, DE (Residence), DE
(Nationality),

GNAN Wernere, Industriestrasse 7, 74918 Angelbachtal, DE, DE (Residence),
DE (Nationality),

GOLDMANN Daniel, Schwindstrasse 3, 68163 Mannheim, DE, DE (Residence), DE
(Nationality),

GROSS Antonia, Hermann-loens-strasse 24, 69226 Nussloch, DE, DE
(Residence), DE (Nationality),

GROSS Patrick, Steinmetzweg 34, 64625 Bensheim, DE, DE (Residence), DE
(Nationality),

HARTMANN Nils, Panoramastr. 134, 69126 Heidelberg, DE, DE (Residence), DE
(Nationality),

HETZER Stephan, Am Hardweg 9, 76684 Oestringen-Eichelberg, DE, DE
(Residence), DE (Nationality),
